

The Spanish Wind Energy Association presents the English version of www.aeeolica.org: all the sector's information with an international focus

Madrid, 21th July 2009.- From today, the website of the **Spanish Wind Energy Association (AEE)** offers its content also in English and takes an international scope with all the necessary information from the Spanish wind energy sector.

With this new approach, **AEE** confirms its status as a referent in the wind energy sector internationally, being a global industry leader with 16,740 MW installed by January 1st 2009 in our country and with the presence of Spanish companies in many of the major international markets, with over 8,000 MW installed.

The English version of www.aeeolica.org keeps the same sections that the Spanish one, being divided into four main parts: [The Association](#), [Wind Power Observatory](#), [Events](#) and [Press Room](#).

Among the information provided on [Wind Power Observatory](#), we highlight the [Wind Map](#) section, where you can find the location of all wind farms in Spain, and the data and characteristics of each one of them. Also, the general statistics of wind energy development in our country as well as in the rest of the world are available in this same section, showing the installed capacity by region and by developers or manufacturers, the generation of wind energy in the recent years, and links to websites that make the daily wind forecasting and monitoring.

[The Association](#) contains, in addition to the list of almost two hundred companies members of **AEE** and the composition of their governing bodies, key publications produced by the Association, such as the yearbook **Wind Power'09** or *The Macroeconomic Study on the impact of Wind Energy in Spain* carried out by Deloitte.

Events offers a journey through the upcoming seminars and conferences organized by **AEE** as well as the ones that have already taken place since its foundation, such as the **Wind Energy Convention** or the **Technical Conferences in Wind PowerExpo**. It also contains a list of the upcoming wind events being held around the world.

Finally, Press Room shows, in addition to all the press releases issued by **AEE**, the information and videos regarding the advantages of using this clean and renewable energy.
