

The Spanish Wind Energy Association will celebrate its 1st Grid Integration Seminar **TECHWINDGRID´09**

Madrid, November 4th, 2008.- The Spanish Wind Energy Association (Asociación Empresarial Eólica-AEE) is organising its 1st Grid Integration Seminar **TECHWINDGRID´09** in Madrid on the **20th and 21th of April** which includes several conferences that will be a unique opportunity to exchange ideas and to share experiences in relation to wind energy and its grid integration.

The objectives of these conferences are the evaluation of the experiences of wind power integration, the discussion of the results and improvements of the operation of wind power in the electrical system, and the analysis of the new advanced solutions to optimise the electrical generation and the reliability of the grid.

This seminar's modality is "*Call for Papers*", and **AEE** opens the call for submissions from all participants interested in contributing with their experiences to this event. The submission of proposals shall be sent in English to **AEE** before December 30th on the following link: http://www.aeeolica.es/eventos_suscripcion.php
